History of our business operations starts in 1993. During more than two decades fluid automation business line has been successfully developing. Thousands of various projects that comprise oil lubrication, hydraulics and pneumatic have been successfully implemented over this period. Since year 2014, business has been presented to the customers under new brand-name CENMIA.

Main activity of Cenmia Oy covers design and development, manufacturing and maintenance, supply and commissioning of fluid automation solutions for Pulp and Paper industry.

From DESIGN to SUPPLY

HYDRAULIC

- | Hydraulic units
- | Control panels
- | Hydraulic manifolds
- | Complex systems

LUBRICATION

- | Oil lubrication units
- | Sump-units
- | Flow meters
- | Air space dryers

AUXILIARY

- | Water power units
- | Pneumatic systems
- | Service units (e.g. filtration)
- | Blowers

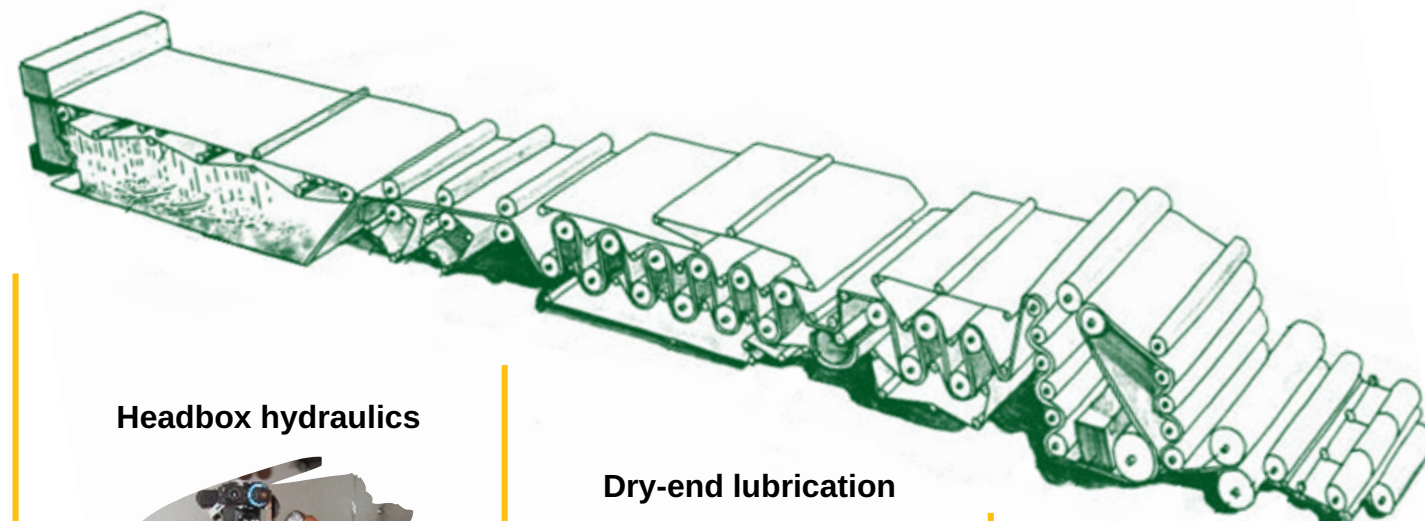

Our deliveries include both: smaller single hydraulic and lubrication units, as well as a complete system packages, like large-scale plants and complex functional systems. Moreover, we are supplying sub-systems, spare parts and other auxiliary equipment in terms of project deliveries. Such kind of deliveries allow our Customers to obtain additional savings by avoiding smaller multi-channels supplies and downsize the area of responsibility.

Constant development and improvement is the key priority of our business concept. Cenmia Oy constantly invest vast amount of resources for researches and developments in the field of fluid automation technologies, as well as operational management and production processes.
